Experience

Senior Software Engineer – Capgemini Sep 2025 – Present
Client: Sony | Warranty & Service-Order Platform

- Developed C#/.NET REST APIs and SQL Server components for Sony's warranty and service-order platform, supporting third-party integrations and partner workflows.
- Developed and shipped Create, Patch, and Get REST APIs enabling partner channels to submit and update service orders through RPOC/RPSI interfaces.
- Optimized SQL Server stored procedures and queries (joins, indexing) for master-data retrieval, tax-master processing, and batch imports, reducing service-order query latency by ∼30%.
- Diagnosed third-party orders that completed in the backend but failed to appear in the UI by tracing API, database, and interface-configuration flows.
- Resolved Origin Code, field-mapping, and integration-flag issues to ensure partner orders followed the intended processing path.
- Resolved timezone-conversion defects in order-processing APIs, preventing incorrect batch execution windows across regional workflows.
- Resolved 50+ backend and integration defects across .NET APIs, SQL Server workflows, and third-party service-order interfaces.

AWS Solutions Architect Intern Aug 2023 – Nov 2023
Codemithra

- Led design and AWS deployment of a skill-sharing platform on EC2, S3, and IAM, covering architecture, access control, and launch.

Projects

Flight Booking System | *.NET Core, ASP.NET Web API, SQL Server, React, JWT*

- Built a .NET Core / SQL Server booking backend with REST APIs for flight search, booking, and admin operations, plus a React client.
- Implemented JWT-based authentication and role-based authorization across customer and admin REST endpoints.
- Optimized SQL queries for flight availability and filtering in real-time search workflows.

AI Document Intelligence | *Azure OpenAI, OCR, Python*

- Built a document-processing pipeline using OCR and Azure OpenAI to extract and classify structured information from PDFs, Word files, and images.
- Implemented document-specific extraction and summarization workflows for invoices, resumes, and contracts.
- Automated extraction of structured fields from unstructured documents, reducing manual review and data-entry effort.

Education

Vellore Institute of Technology Chennai, India
B.Tech in Computer Science and Engineering; CGPA 8.74 / 10 *2021 – 2025*

Certifications

AWS Certified Solutions Architect – Associate
AWS Certified Cloud Practitioner | Microsoft Azure Fundamentals (AZ-900) | Microsoft Azure AI Fundamentals (AI-900)

Technical Skills

Backend: C#, .NET Core, ASP.NET Web API, REST APIs, SQL Server, T-SQL, Stored Procedures
Cloud: Azure, Azure OpenAI, AWS (EC2, S3, IAM)
Frontend: Angular, React
Tools: Git, Postman, Swagger, SonarQube
